

Cookie policy

Last updated: 2026-05-05. This policy explains what cookies and similar technologies findmyrave.com uses, and your choices.

The short version

findmyrave.com is a static info site. No tracking cookies. No analytics cookies. No ad cookies. No Google Analytics, no Meta Pixel, no third-party tracker.

That's why there's no cookie banner. The EU ePrivacy Directive (article 5(3)) and Belgian implementing law only require consent for non-essential storage, and we don't store anything non-essential.

What we do use

Strictly necessary technologies

Loading findmyrave.com may involve:

- **Cloudflare security cookies** — our hosting provider, Cloudflare Pages, may set cookies named `__cf_bm` or `cf_clearance` to protect the site from bots and abuse. These are

required for the site to work and are exempt from consent.

- **Browser storage for the live events list** — when the homepage fetches upcoming events from our Supabase database, your browser may briefly cache the response. We don't read or use this cache server-side.

What we don't use

- No analytics (no Google Analytics, Plausible, Fathom, Cloudflare Analytics with cookies)
- No advertising or retargeting (no Meta Pixel, Google Ads, TikTok Pixel)
- No social media tracking widgets
- No A/B testing tools
- No fingerprinting

Third-party content embedded on the site

Some pages may embed content from external services (for example, an OpenStreetMap tile when we add a map, or an App Store badge image). When we add such embeds, we'll list them here. As of 2026-05-05, no third-party content is embedded on findmyrave.com.

The mobile app is different

This cookie policy covers the website only. The FindMyRave mobile app uses on-device storage (Keychain, SharedPreferences, an encrypted SQLite database), not browser cookies. For details on what the app stores, see our [Privacy Policy](#).

Your choices

You can block or delete cookies in your browser settings at any time. Doing so won't break findmyrave.com because we don't rely on cookies for any feature.

Changes to this policy

If we add tools that set non-essential cookies (for example, privacy-respecting analytics), we'll update this page and add a consent banner before activating them.
